Attributes its 1,296-Percent Revenue Growth to Delivering Software that Adapts to Customer Needs

**Livonia, Mich.**, October 19, 2006 - WorkForce Software, Inc., a leader in enterprise time and attendance software systems, announced today that it ranked 147th on Deloitte's 2006 Technology Fast 500, a ranking of the 500 fastest growing technology, media, telecommunications and life sciences companies in North America. Rankings are based on percentage revenue growth over five years, from 2001–2005. WorkForce Software grew 1,296-percent during this period.

WorkForce Software's CEO, Kevin Choksi, credits the flexibility of its software solution and the experience and dedication of the team with the company's 1,296-percent revenue growth over the past five years. "Our goal is to provide the most flexible workforce management system on the market. Our approach to business is pragmatic: stick to core strengths and re-invest a large portion of revenue back into research and development. The results are clear; we've grown our customer base, our revenues and our profits steadily over the years. Being recognized as one of Deloitte's 2006 Technology Fast 500 is an exceptional honor and we are proud of what our team has accomplished," said Choksi.

"To be successful in today's increasingly competitive landscape, companies have to be better, smarter, and more innovative than in the past, and the Technology Fast 500 companies are doing exactly that," said Tony Kern, deputy managing principal of Deloitte's Technology, Media & Telecommunications industry practice. "We applaud WorkForce Software for being among the fastest growing companies in North America."

The Fast 500 ranks the fastest growing technology, media, telecommunications and life sciences companies in North America. It is compiled from Deloitte's 16 regional North American Fast 50 programs, nominations submitted directly to the Fast 500, and public company database research. Companies are selected based on percentage revenue growth from 2001 to 2005.

Entrants must own proprietary intellectual property or proprietary technology that contributes to a significant portion of the company's operating revenues or devote a significant proportion of revenues to research and development of technology. Using other companies' technology or intellectual property in a unique way does not qualify. Base-year operating revenues must be at least \$50,000 USD or \$75,000 CD, and current-year operating revenues must be at least \$5 million USD or CD. Companies must be in business a minimum of five years, and they must be headquartered within North America.
